

ANXIETY DISORDER DUE TO...*

[A General Medical Condition]

SUMMARY SCREENING CRITERIA* FOR: Name _____

- A. Prominent anxiety, panic attacks, or obsessions or compulsions predominate in the clinical picture.
- B. There is evidence from the history, physical examination, or laboratory findings that the disturbance is the direct physiological consequence of a general medical condition.
- C. The disturbance is not better accounted for by another mental disorder (e.g., Adjustment Disorder With Anxiety in which the stressor is a serious general medical condition).
- D. The disturbance does not occur exclusively during the course of a delirium.
- E. The disturbance causes clinically significant distress or impairment in social, occupational, or other important areas of functioning.

Specify if: **With Generalized Anxiety:** if excessive anxiety or worry about a number of events or activities predominates in the clinical presentation
With Panic Attacks: if Panic Attacks predominate in the clinical presentation
With Obsessive-Compulsive Symptoms: if obsessions or compulsions predominate in the clinical presentation
